1 INTRODUCTION

This deliverable has as main objective to codify best practice lessons in managing the rural and agricultural transformation following EU accession into a user-friendly form. It is based on the conclusions from the case studies analysis provided by WP8 and D9.1 “Best practice lessons in managing the rural and agricultural transition following EU membership” (see www.scarled.eu). To achieve this objective a Policy Delphi structured questionnaire was constructed and piloted at Newcastle University.

Additionally, the best practice lessons were subject to scrutiny and feedback during a workshop organised by the SCARLED coordinators during the IAMO Forum 2009. The workshop which had as main focus to conduct the Policy Delphi exercise took place in Halle on the 19 June, 2009. Some 30 experts participated and contributed to this workshop. All the responses were analysed by the UNEW partner and discussed with the SCARLED coordinators and another round of piloting took place at Newcastle in early July. Following, the Policy Delphi questionnaire was improved and its final version is presented in Section 2. This is accompanied by a cover letter addressed to a panel of experts selected from both established and new member states.

The questionnaire will be send out during the following three months to experts from both established and new member states and it will be available on the Scarled website.

2 POLICY DELPHI INSTRUMENT FOR AGRICULTURE AND RURAL DEVELOPMENT

Cover Letter

Dear Expert,

One of the main objectives of the SCARLED project (Structural Change in Agricultural and Rural Livelihoods, a 6th framework project funded by the European Commission) is to understand the patterns behind rural "success stories" in selected EU15 case countries, identifying and codifying best practices, and drawing recommendations for the new member states. As part of this project, the Centre for Rural Economy (CRE) at Newcastle University is conducting a Policy Delphi exercise with experts from both established and new EU member states. As a relevant expert, we ask for your help by completing the attached questionnaire.

The aim of this exercise is to verify and refine the lessons in managing agricultural and rural transition following EU accession. In particular we seek to understand success factors for managing agricultural and rural transition in an enlarged EU, which can support the design of rural development policy recommendations for the new EU member states. The questionnaire consists of three major parts: (i) major factors/driving forces for changes in rural areas; (ii) lessons of best practice for implementing rural development policy and (iii) possible future policy options for rural development. The questionnaire should take 10 minutes to complete.

The process follows the Policy Delphi approach. All expert responses will remain anonymous and data collection proceeds as a series of rounds. Thus, you will be given the opportunity to revise your views at a later date. All participants will receive summary information on the views of others participants (*e.g.* corresponding mean value of the panel's opinion). The data will be analysed by the CRE who will supply the overall outcome to all panel's members. If you have any questions, please do not hesitate to contact us.

We would like to thank you in advance for your time and cooperation. More information and details about the project can be found on the SCARLED website at <http://www.scarled.eu> or please contact
